JAVA & FRONT-END DEVELOPER | FRESHER

CAREER OBJECTIVE

Motivated Computer Science graduate seeking an entry-level **Java** and **Front-End Developer** position. Eager to apply knowledge of **Java, HTML5, CSS3, JavaScript, React.js, SQL, and MySQL** to develop responsive, user-friendly, and reliable applications while learning and contributing to real-world software projects. Strong problem-solving skills with a willingness to learn new technologies and adapt to professional development environments.

EDUCATION

B.Tech. in Computer Science — GITAM University, Bengaluru | 2026 | CGPA: 7.01/10

Intermediate (12th Grade) — Sri Chaitanya Jr College, Kurnool | 2022 | Percentage: 90.04%

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL
Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS
Core Concepts: Object-Oriented Programming (OOP), Basic problem solving
Database: SQL
Development Tools: VS Code, Git, GitHub

PROJECTS

Food Blog Website | HTML, CSS, Tailwind CSS

• Developed a responsive food blog website featuring **Home, About, Items, and Support** sections, with a clean and user-friendly interface. Implemented responsive layouts and modern styling using **HTML, CSS, and Tailwind CSS** to provide a smooth browsing experience across different screen sizes.

Wildlife Intrusion Detection System in Farms Using Vision Transformer

• Built a web application that allows users to upload animal images and receive predictions using a Vision Transformer (ViT) model, classifying more than 90 animal species to help reduce crop damage. Integrated the trained ViT model with a Flask-based web application for image preprocessing, prediction, and result display. Applied image preprocessing and data augmentation techniques to improve model performance and reliability.

Intrusion Detection System for In-Vehicle Networks Using Machine Learning

• Worked on a machine-learning-based system to detect and classify DoS, Spoofing, Replay, and Fuzzing attacks in automotive networks. Covered data preprocessing, feature extraction, and real-time anomaly detection concepts. Implemented various algorithms such as decision trees and neural networks to enhance detection accuracy. Additionally, optimized the system for low-latency processing, ensuring rapid response to potential threats.

CERTIFICATIONS

• C Programming on Coursera
• Machine Learning Foundation and Certification
• Full Stack Web Development
• Explore Machine Learning Using Python

STRENGTHS

• Problem Solving and Analytical Thinking
• Team Collaboration and Communication
• Time Management and Organization

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
